Critique - goodbooksfor.me

What did we do well?

- The detail and quantity of information provides for an informing and enriching experience for our users.
- Easy to navigate, and categories that were N/A are not shown

What did we learn?

- How to work effectively as a team to produce a quality website
- How to be flexible, communicate, and efficiently distribute workload
- How to use PostgreSQL and host a website on GFP

Critique - goodbooksfor.me

What can we do better?

- Place the navigation links to our three categories at the center of the webpage for users to find their desired information.
- Allow users to sort with other categories besides title/name

What puzzles us?

- How to normalize the books data
- There's still a lot to learn about GCP and web development

Critique - Group 4

What did they do well?

-

What did we learn from the website?

-

Critique - Group 4

What can they do better?

What puzzles us about the website?
